Skip counting and repeated addition are good ways to prepare for multiplication. In order to help your child see the link between multiplication and skip counting, point out that they are tracing the multiples of six in the charts below, for example.

■ Say each number aloud as you trace it.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20

6-60

■ Draw a line from 6 to 60 in order while saying each number aloud.

■ Add the numbers below.

(1) $6 + 6 = 12$

(2) $6 + 6 + 6 = 18$

(3) $6 + 6 + 6 + 6 = 24$

(4) $6 + 6 + 6 + 6 + 6 = 30$

Repeated addition is good preparation for multiplication. In order to help your child see the link between multiplication and repeated addition, ask him or her how many sixes there are in the number sentences below, for example.

(3) $6 + 6 + 6 + 6 = 24$

(4) $6 + 6 + 6 + 6 + 6 = 30$

- Write the numbers on the number line. Then add the numbers below.

To parents

Repeated addition is good preparation for multiplication. In order to help your child see the link between multiplication and repeated addition, ask him or her how many sevens there are in the number sentences below, for example.

■ Say each number aloud as you trace it.

7	14	21	28	35
---	----	----	----	----

(1) $7 + 7 = 14$

(2) $7 + 7 + 7 = 21$

(3) $7 + 7 + 7 + 7 = 28$

(4) $7 + 7 + 7 + 7 + 7 = 35$

■ Write the numbers on the number line. Then add the numbers below.

7				
---	--	--	--	--

(1) $7 + 7 =$

(2) $7 + 7 + 7 =$

(3) $7 + 7 + 7 + 7 =$
