Advice

If you scored over 85 on this section, review your mistakes and move on to the next section.

If you scored between 75 and 84 on this section, review your addition a little more before continuing.

If you scored less than 74 on this section, it might be a good idea to go back to our "Grade 1 Addition" book and do an extended review of addition.

Advice

Was this easy for you?

Keep practicing until you can finish a page without any mistakes. Remember that when you are subtracting a 1-digit number from 20, the answer will be a 2-digit number.

Also, when you subtract zero from a number you subtract nothing.

The answer will be the same number!
