Introduction to Multiplication: Adding Groups

Learn how to multiply by thinking of numbers as groups. Use the groups of tulips to help you answer each multiplication problem.

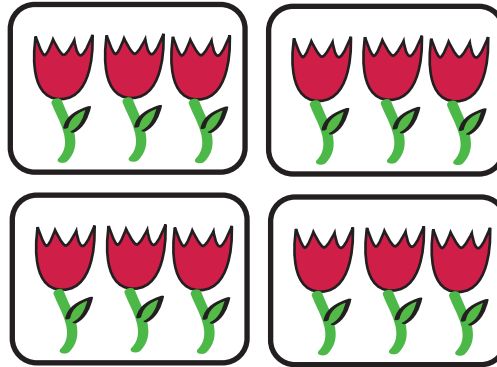

Example:

2 groups each with 3 tulips each.

There are 6 tulips in total.

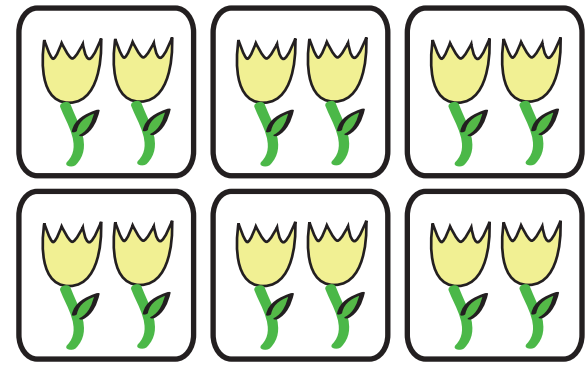

$$\underline{2} \times \underline{3} = \underline{6}$$

___ groups each with ___ tulips each.

There are ___ tulips in total.

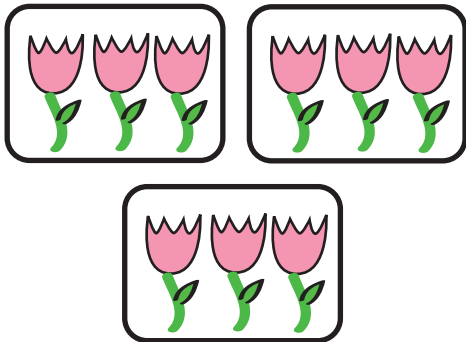

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

___ groups each with ___ tulips each.

There are ___ tulips in total.

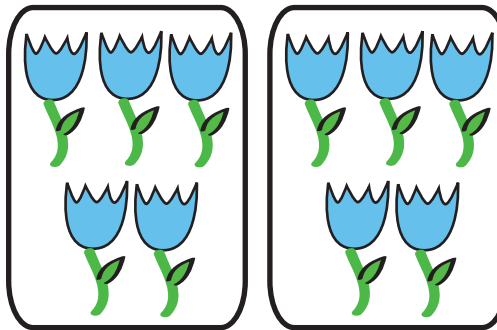

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

___ groups each with ___ tulips each.

There are ___ tulips in total.

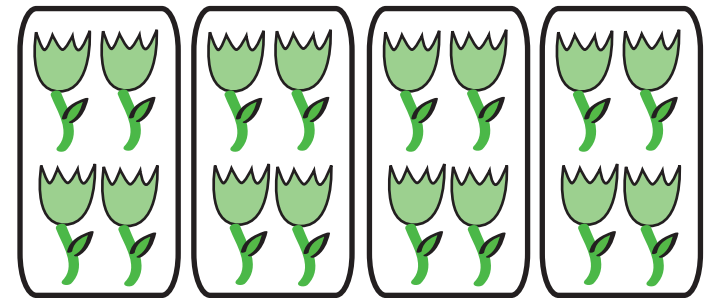

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

___ groups each with ___ tulips each.

There are ___ tulips in total.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

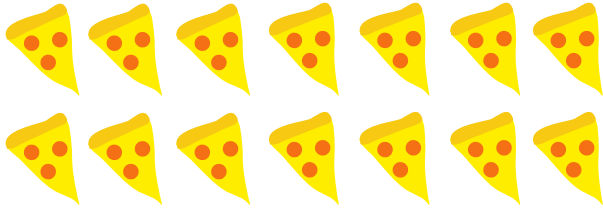

___ groups each with ___ tulips each.
