# Multiplication with Regrouping

Multiplication with regrouping is the easiest way to multiply by large numbers.  
Follow the steps below to learn how.

- First, multiply the numbers in the ones place.
- Write your result in the ones place and carry any number in the tens place forward.
- Next, multiply the number in the tens place by the bottom number in the ones place.
- Add the extra number you carried over to your result and write this number in the tens place.

**Example:**

Multiply the ones place.	$\begin{array}{r} 17 \\ \times 3 \\ \hline 1 \end{array}$	Carry the 2 to the tens place.	$\begin{array}{r} 2 \\ 17 \\ \times 3 \\ \hline 1 \end{array}$	Multiply the tens place by the bottom ones place.	$\begin{array}{r} 2 \\ 17 \\ \times 3 \\ \hline 1 \end{array}$	Add the extra 2 and write your result.	$\begin{array}{r} 2 \\ 17 \\ \times 3 \\ \hline 51 \end{array}$
$7 \times 3 = 21$				$1 \times 3 = 3$		$3 + 2 = 5$	

For each problem below, follow the steps used in the example to find your solution.

# Multiplication with Regrouping

Multiplication with regrouping is the easiest way to multiply by large numbers.  
Follow the steps below to learn how.

- First, multiply the numbers in the ones place.
- Write your result in the ones place and carry any number in the tens place forward.
- Next, multiply the number in the tens place by the bottom number in the ones place.
- Add the extra number you carried over to your result and write this number in the tens place.

**Example:**

Multiply the ones place.	$\begin{array}{r} 17 \\ \times 3 \\ \hline 1 \end{array}$	Carry the 2 to the tens place.	$\begin{array}{r} 2 \\ 17 \\ \times 3 \\ \hline 1 \end{array}$	Multiply the tens place by the bottom ones place.	$\begin{array}{r} 2 \\ 17 \\ \times 3 \\ \hline 1 \end{array}$	Add the extra 2 and write your result.	$\begin{array}{r} 2 \\ 17 \\ \times 3 \\ \hline 51 \end{array}$
