GROUPS

Groups of objects are really quite neat,

from legs on a spider to your hands and your feet;

What can you find in a pair of two?

Your socks and your arms and even your shoe;

And what might you see in a group of 3?

Sides on a triangle or birds in a tree.

From a four-legged dog to the wheels on a car,

equal groups of 4 can be found near or far;

Just step outside and take a good look around,

You'll certainly see that equal groups abound.

MINI MULTIPLICATION BOOK

3 x 2 = ?

MINI MULTIPLICATION VOCAB BOOK

DIRECTIONS

Step 1: Cut out each mini-page.

Step 2: Staple the pages together in order.

Step 3: Use this book as a helpful resource as you complete the activities in this workbook.

KEY INFORMATION

MULTIPLICATION:

Factors are multiplied together to find the product or total, for example;

3 x 5 = 15

KEYWORD #1

REPEATED ADDITION:

Adding the same number multiple times in order to find the total, for example;

4 + 4 + 4 = 12

KEYWORD #2

FACTOR:

One of two or more numbers that are multiplied together to find a product.

6 x 4 = 24

factor

KEYWORD #3

PRODUCT:

The result when two numbers are multiplied together.

6 x 4 = 24

product

KEYWORD #4

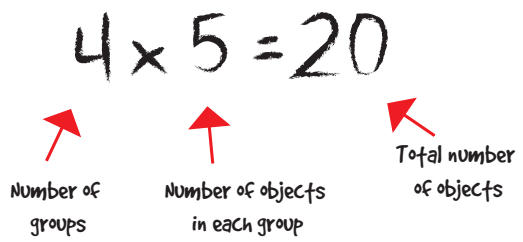
What do you Say, Let's Make an Array!

Directions

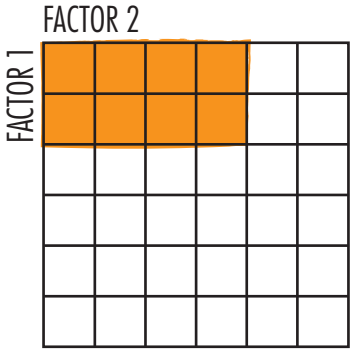
Review what each factor represents in this multiplication sentence:



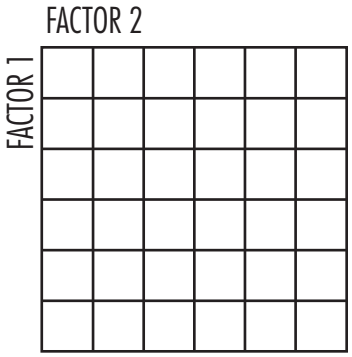
Color in each array. The first array has been colored in for you.

Example

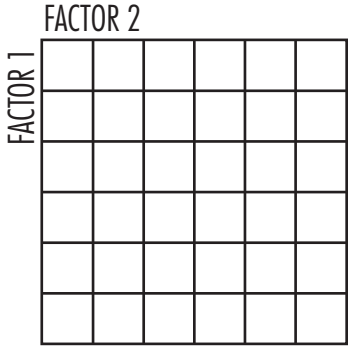
1 **2 x 4 = 8**



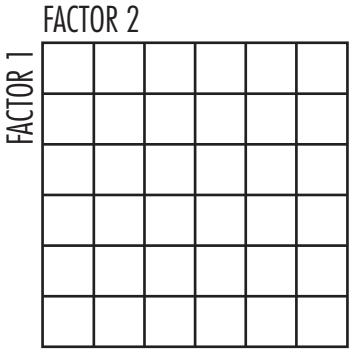
2 **3 x 5 = 15**



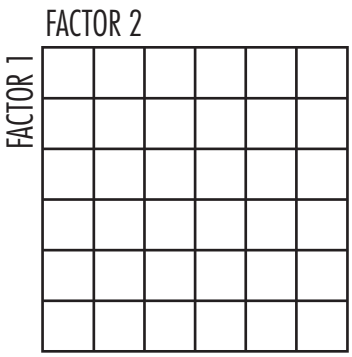
3 **1 x 2 = 2**



4 **4 x 4 = 16**



5 **4 x 5 = 20**



6 **6 x 5 = 30**

Repeated Addition

You can use repeated addition to find the total number of objects in equal groups.
For example, look at this problem.

 = 6

Since there are 3 equal groups of 2, the repeated addition sentence is: **2 + 2 + 2 = 6.**

Use repeated addition to find the total number of objects in each question below.

Multiplication Fact Practice

Directions

Memorizing your multiplication facts is an important skill to practice. Use this multiplication table to review your facts.

Multiplication Fact Practice 0 to 4

1 x 3	4 x 0	9 x 4	8 x 3	5 x 2	11 x 4	0 x 1	12 x 3
12 x 2	0 x 3	7 x 4	3 x 1	6 x 4	2 x 1	10 x 2	8 x 4
4 x 2	7 x 0	11 x 3	2 x 4	6 x 1	10 x 4	5 x 3	1 x 4
3 x 2	5 x 4	10 x 3	4 x 3	9 x 3	2 x 3	8 x 2	11 x 1
12 x 4	9 x 0	3 x 4	8 x 1	1 x 2	7 x 3	0 x 2	6 x 3

Multiplication Fact Practice 5 to 8

5 x 2	6 x 7	7 x 4	5 x 3	7 x 2	8 x 4	5 x 5	8 x 8
7 x 9	5 x 8	6 x 2	6 x 10	7 x 11	5 x 4	6 x 8	6 x 12
7 x 12	7 x 1	6 x 4	5 x 11	6 x 5	7 x 10	8 x 3	8 x 6
8 x 10	6 x 9	7 x 2	5 x 6	7 x 3	6 x 3	8 x 2	5 x 7
5 x 8	6 x 0	7 x 4	8 x 1	8 x 2	6 x 11	7 x 0	5 x 12

Multiplication Fact Practice 9 to 12

9 x 2	12 x 7	10 x 4	11 x 3	10 x 8	11 x 4	9 x 5	9 x 0
12 x 9	12 x 8	12 x 2	11 x 10	10 x 11	11 x 5	10 x 3	9 x 12
9 x 12	9 x 1	10 x 4	11 x 11	12 x 5	9 x 11	11 x 3	11 x 6
10 x 5	10 x 9	10 x 2	9 x 6	8 x 3	9 x 3	12 x 6	11 x 7
9 x 8	12 x 0	12 x 12	11 x 6	10 x 10	9 x 9	12 x 3	12 x 11

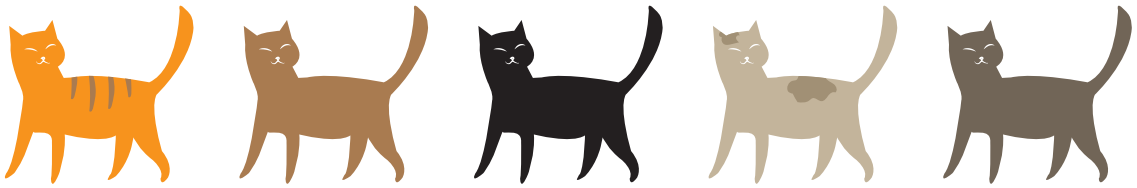
Equal Group Problems

Directions

In the problems below, use repeated addition and multiplication to find the total number of objects.

Example



Find the total number of legs on these five furry cats.

Repeated addition sentence: 4 + 4 + 4 + 4 + 4 = 20 legs

There are 5 equal groups of 4.

Now, write the multiplication sentence: 5 x 4 = 20 legs

Now you try!

1 **Find the total number of petals on the flowers.**

Repeated addition sentence: _____

There are 3 equal groups of 5.

Now, write the multiplication sentence: _____

2 **Find the total number of pieces of candy in the candy jars.**

Addition sentence: _____

There are 6 equal groups of 3.

Now, write the multiplication sentence: _____

education.com

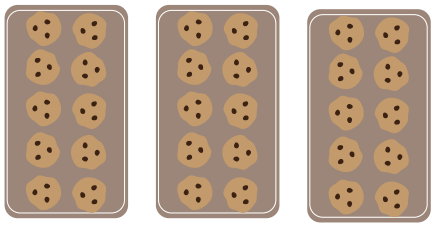
Repeated Addition and Multiplication

Multiplication can be thought of as addition of the same number multiple times in order to find a total. This is also called repeated addition. Both multiplication and repeated addition are used to find the total number of objects in equal groups.

For example, if you have 3 trays with 10 cookies on each tray, you can find the total number of cookies with this repeated addition sentence:

10 + 10 + 10 = 30 cookies



Since there are 3 equal groups of 10, you could also solve this problem with a multiplication sentence:

$3 \times 10 = 30$

- 3: Number of groups
- 10: Number of objects in each group
- 30: Total number of objects

Practice writing both addition and multiplication sentences while solving this word problem:

Betty the baker signed up to bring 40 brownies to her school's bake sale. Figure out if Betty baked enough brownies by finding the total number of brownies in each batch. Batch #1 has been figured out for you.

BATCH #1

Repeated addition sentence: 5 + 5 + 5 = 15

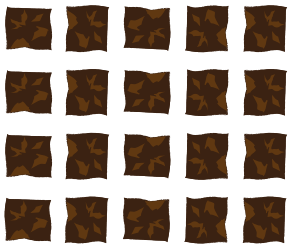
Multiplication sentence: 3 × 5 = 15

BATCH #2

Repeated addition sentence: _____

Multiplication sentence: _____

BATCH #3



Repeated addition sentence: _____

Multiplication sentence: _____

Did Betty have enough brownies for the bake sale? _____
Show your work on the back of this paper.

Answer Sheet

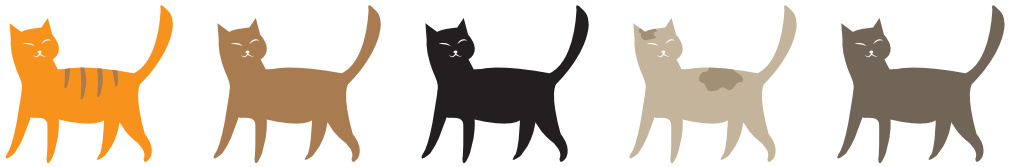
Equal Group Problems

Directions

In the problems below, use repeated addition and multiplication to find the total number of objects.

Example



Find the total number of legs on these five furry cats.

Repeated addition sentence: 4 + 4 + 4 + 4 + 4 = 20 legs

There are 5 equal groups of 4.
Now, write the multiplication sentence: 5 x 4 = 20 legs

Now you try!

1 **Find the total number of petals on the flowers.**

Repeated addition sentence: 5 + 5 + 5 = 15 petals

There are 3 equal groups of 5.
Now, write the multiplication sentence: 5 x 3 = 15 petals

2 **Find the total number of pieces of candy in the candy jars.**

Addition sentence: 3 + 3 + 3 + 3 + 3 + 3 = 18 pieces of candy

There are 6 equal groups of 3.
Now, write the multiplication sentence: 3 x 6 = 18 pieces of candy

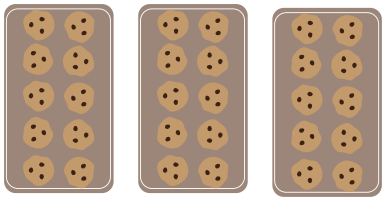
Answer Sheet

Repeated Addition and Multiplication

Multiplication can be thought of as addition of the same number multiple times in order to find a total. This is also called repeated addition. Both multiplication and repeated addition are used to find the total number of objects in equal groups.

For example, if you have 3 trays with 10 cookies on each tray, you can find the total number of cookies with this repeated addition sentence:

10 + 10 + 10 = 30 cookies



Since there are 3 equal groups of 10, you could also solve this problem with a multiplication sentence:

$3 \times 10 = 30$

- 3 — Number of groups
- 10 — Number of objects in each group
- 30 — Total number of objects

Practice writing both addition and multiplication sentences while solving this word problem:

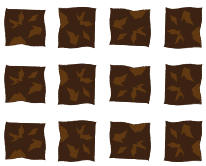
Betty the baker signed up to bring 40 brownies to her school's bake sale. Figure out if Betty baked enough brownies by finding the total number of brownies in each batch. Batch #1 has been figured out for you.

BATCH #1

Repeated addition sentence: 5 + 5 + 5 = 15

Multiplication sentence: 3 × 5 = 15

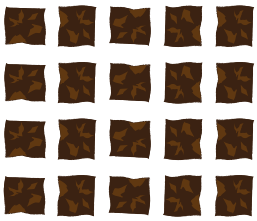
BATCH #2



Repeated addition sentence: 4 + 4 + 4 = 12

Multiplication sentence: 4 x 3 = 12

BATCH #3



Repeated addition sentence: 5 + 5 + 5 + 5 = 20

Multiplication sentence: 5 x 4 = 20

Did Betty have enough brownies for the bake sale? Yes

Show your work on the back of this paper.

15 + 12 + 20 = 47 brownies
