NATIONAL SYMBOLS THE FLAG

DIRECTIONS: Read the passage and answer the following questions.

The U.S. flag has undergone many changes since the first original flag in 1777. Before the official flag there had been many different flags that were popular in different colonies, but the Betsy Ross Flag was the first official national standard. In June 1776 George Washington asked Betsy Ross to sew a flag for the new country. He and a committee had come up with a design and requirements that it must have 13 stars and 13 stripes, each

to stand for the colonies. The flag should be in red, blue and white. She designed the stars in a circle over a blue field.

On June 14, 1777 the Continental Congress passed the Flag Act, which said that the flag would be made of white and red stripes and thirteen stars on blue. The number of stars were based on the 13 colonies and more stars were added as the US grew and got more states.

1. Why are there 13 stripes?

2. What do the stars on the flag stand for?

- 3. How many stars did the flag originally have?
- 4. Who made the first official flag?
- 5. What colors are the flag?

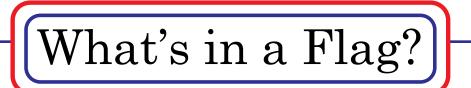

In Colonial and early U.S. history the flag went through different designs. Draw one of the earlier versions of the flag and the current American flag below.

The Lincoln Memorial is located in our nation's capital, the District of Columbia or Washington, D.C.. This monument has also been featured on the back of the one-cent coin.

Complete the maze!

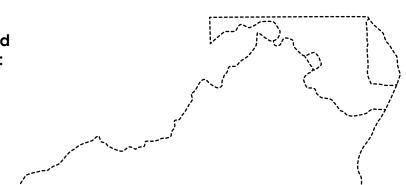

On a map, D.C. looks like it could be part of Maryland, but the nation's capital isn't part of any state. Early in U.S. history it was thought that if the capital was actually part of a state, it would give an unfair advantage to that state.

Outline the partial map to the right and label each section with the following:

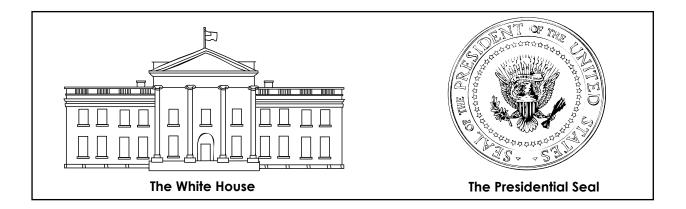

- A Maryland
- **B** Virginia
- C- Washington, D.C.
- D Delaware

The White House is where the president and his family live while he serves as president. It's also a workplace for the president and the cabinet.

Currently it's at 1600 Pennsylvania Avenue in Washington D.C.. The first presidential house was in Philadelphia, Pennsylvania. This was the temporary capital while buildings in Washington D.C. were being constructed. In 1800 John Adams was the first president to live in the White House. Fourteen years later British troops set fire to it during the War of 1812. The damaged parts were reconstructed. By the mid-1800s it was clear that the White House needed to be expanded to accommodate the number of people who worked with the president daily. President Theodore Roosevelt built an office and workspaces onto the back of the White House in 1902, now known as the West Wing. Since then, many presidents have had special rooms put into the house during their stay, like swimming pools, bowling alleys, and gyms!

You learned in the previous worksheet that the capital of the United States is located in the District of Columbia. You also learned that the District of Columbia is not part of any state because it represents the whole country, not just parts of the country. Why do you think it is a good idea that the President of the United States lives in the White House in the District of Columbia instead of his or her own house in another state?

The Library of Congress is in Washington D.C.. President John Adams signed a bill in 1800 that created the Library of Congress as a library for members of Congress, with only books that they might need for their work. However, during the War of 1812 the small library was destroyed in a fire set by British troops during an invasion. An **avid** reader, former president Thomas Jefferson donated his collection of books to re-establish the library. Jefferson believed that all subject matter was important for the **legislature**, not just what seemed obvious for the work of Congress. The practice of collecting books on all kinds of subjects has gone on since. This is reflected by the library's **comprehensive** collection of books. The Library of Congress began collecting **copyrighted** books. When they ran out of space in the Capitol, a new building was built on the National Mall in 1886. It still stands there today. The library also researches American life, documenting and keeping multimedia records of unique cultures, societies and ways of life in the United States.

The Star-Spangled Banner is the flag that inspired Francis Scott Key to write a poem that he later set to music. During the War of 1812, Key was detained on a British ship. He saw the flag still raised and flying early in the morning after a major battle at Fort McHenry, and was inspired to write a poem about his experience. During the Civil War, the song became popular with Union troops and supporters. It was made our official national anthem in 1931. The actual "star-spangled banner," a 30-foot-tall flag that he saw from the ship is on display at the Smithsonian's National Museum of American History.
