FIND THE TERMS LISTED BELOW IN THE WORD SEARCH PUZZLE!

Bald Eagle: The national bird of the United States of America.

Stars: There are 50 white stars on the American flag, representing the 50 states.

Stripes: There are 13 red and white stripes on the American flag, representing the original 13 colonies.

Congress: Contains the House of Representatives and the Senate.

President: The Chief Executive of the USA.

Liberty: One of the unalienable rights of people, as listed by the Declaration of Independence.

Bill of Rights: The first 10 amendments to the United States constitution.

Independence: The promise of self-government. The United States of America formally declared independence from Great Britain on July 4th, 1776.

Washington: America's first president, the location of our Capital, one of our states, and countless cities, towns, and streets!

States: The United States of America is made up of 50 states. The youngest is Hawai'i, which became a state on August 21st, 1959.

Patriot: A person who feels strong support and love for their country. Those who supported the cause of independence in the American Revolution were referred to as patriots.

Historical Heroes: César Chávez

Cesar Chavez

César Chávez was born in Arizona in 1923. When his family lost their farm during the Great Depression, they packed up their things and began moving from farm to farm, looking for whatever work they could find. César was forced to quit school after eighth grade and work to support the family.

When he grew up, Chávez decided to help other farm workers like himself. He helped found the United Farm Workers, a union that fought for safe working conditions and better wages. In 1988, Chávez completed a 36-day fast in protest of the dangerous and difficult work conditions on the farms.

Word scramble!

Unscramble the letters to form the word that completes the sentence.

1. Chávez also helped Mexican _____ farm workers to learn to speak English. MIGIMTRAN
2. _____ farm workers do not live in one place. They move on to a new farm whenever work runs out. ANIGRTM
3. Cesar Chavez founded United Farm Workers with fellow activist Dolores _____. UHRTAE

Dinosaurs roamed the earth millions of years ago as predecessors of egg-laying reptiles. Some ate plants and some ate meat; some walked on two hind legs, some on all fours, and some were able to fly. Find the hidden dinosaur vocabulary. The words are spelled forward, backward, diagonally, and down.

All About Our Earth's Ecosystems!

TEMPERATE OCEANS

About Temperate Oceans:

The temperate oceans are found between the tropical oceans and the polar oceans. Temperate oceans are very productive, especially at coastlines. A hugely diverse range of animals live in temperate oceans, so many that people are still discovering new species routinely! These include some of the tiniest creatures such as microscopic zooplankton; crustaceans such as krill, crabs, and lobsters; endless varieties of fish such as tuna, salmon, herring, and cod; sharks, rays, mammals such as sea lions, dolphins, whales, and otters; jellyfish, turtles, corals, kelp, algae, and many others.

Temperate Oceans Stats:

- Did you know that you can find forests in temperate oceans? Kelp forests are found along coastlines and aren't made up of plants, but seaweed, which is a type of algae. Some kelp can grow up to two feet in a day!
- Much of the world's fishing is done in temperate oceans.
- In coastal areas, temperate oceans support a large number of animals. This is because of coastal upwelling, which brings up nutrient-rich waters from the bottom.

A mineral is a solid formation that grows naturally in the earth. A rock is made up of one or more minerals. Find the rocks and minerals hidden below. All the words are spelled forwards in the circular path.

quartz

diamond

copper

marble

limestone

obsidian

granite

mica

topaz

nickel

Can you name some other rocks and minerals?

GEOLOGY Word Search

The words can be horizontal, vertical, or diagonal.

Find the terms listed below in the word search puzzle!

Volcano: A vent in Earth's surface through which molten rock and gases escape.

Continent: Large landmasses of the Earth.

Subduction: An oceanic plate is pushed underneath either another oceanic plate, or a continental plate.

Magma: A mixture of molten rock and other materials beneath the Earth's surface.

Lava: Molten rock expelled by a volcano during an eruption.

Hotspot: Areas of the mantle that are unusually hot and cause volcanic activity on the Earth's surface

Caldera: A cauldron-like volcanic feature caused by the collapse of land after a volcanic eruption.

Weathering: The breaking down of rocks, soils, and minerals through direct contact with the Earth's atmosphere.

Erosion: The process of the transport of solids from their natural source to a different location, usually through wind, water, and ice.

Igneous: One of the three types of rocks. Igneous rock is formed through the cooling and solidification of lava or magma.

Sedimentary: One of the three types of rocks. Sedimentary rocks are formed from the deposition of mineral or organic sediments.

Metamorphic: One of the three types of rock. Metamorphic rocks are created by the transformation of existing rock through heat and pressure.

Seamount: A mountain rising from the bottom of the ocean, but that does not reach above the surface of the water.

Mountain: A landform that stands higher than the surrounding land, and often has steeper sides than a hill. They are usually formed through volcanism, plate tectonics, or occasionally erosion.

Each plant produces it's own leaf which has many subtle characteristics that separate it from the leaves of other plants. Many leaf shapes, however, are very similar and have been given names to categorize them more easily.

Some leaf shapes are listed below and hidden in the circular word search. Rotate the page to find each leaf. All words are spelled forwards on a circular path.

LANDFORMS

ANSWER SHEET

VOCABULARY

Landforms are natural features of the Earth's surface. They come in many shapes, colors, and sizes. They can be big like Mount Everest or mossy like a marsh! Try and find the different landforms in the canyon below. The words are spelled forwards, diagonal, and down.

peninsula

valley

gulf

mountain

plateau

cave

lake

cape

canyon

strait

island

continent

Name some landforms near where you live.

Answer Sheet

All About Our Earth's Ecosystems!

TEMPERATE OCEANS

About Temperate Oceans:

The temperate oceans are found between the tropical oceans and the polar oceans. Temperate oceans are very productive, especially at coastlines. A hugely diverse range of animals live in temperate oceans, so many that people are still discovering new species routinely! These include some of the tiniest creatures such as microscopic zooplankton; crustaceans such as krill, crabs, and lobsters; endless varieties of fish such as tuna, salmon, herring, and cod; sharks, rays, mammals such as sea lions, dolphins, whales, and otters; jellyfish, turtles, corals, kelp, algae, and many others.

MOLA MOLA

Temperate Oceans Stats:

- Did you know that you can find forests in temperate oceans? Kelp forests are found along coastlines and aren't made up of plants, but seaweed, which is a type of algae. Some kelp can grow up to two feet in a day!
- Much of the world's fishing is done in temperate oceans.
- In coastal areas, temperate oceans support a large number of animals. This is because of coastal upwelling, which brings up nutrient-rich waters from the bottom.

Word Search

Find the temperate ocean terms below in the word search. They can be horizontal or vertical.

- | | |
|---------------|----------------|
| 1) TUNA | 5) GREAT WHITE |
| 2) MOLA MOLA | 6) OTTER |
| 3) BLUE WHALE | 7) HERRING |
| 4) SQUID | 8) KELP |

Reading Vocabulary

ROCKS AND MINERALS

VOCABULARY

A mineral is a solid formation that grows naturally in the earth. A rock is made up of one or more minerals. Find the rocks and minerals hidden below. All the words are spelled forwards in the circular path.

quartz

diamond

marble

obsidian

mica

topaz

copper

limestone

granite

nickel

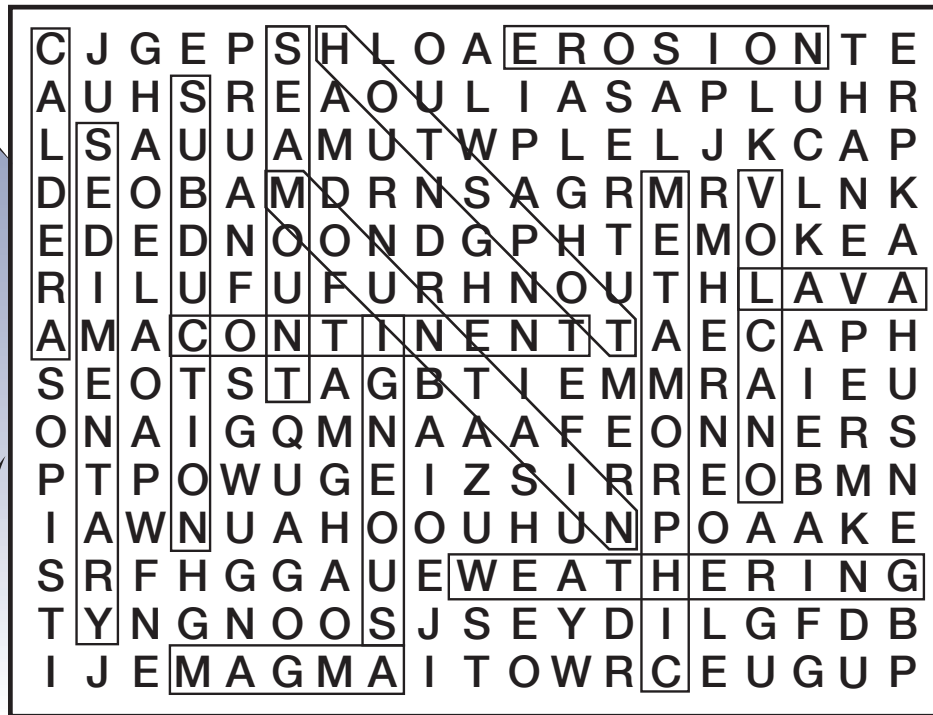

Can you name some other rocks and minerals?

Answer Sheet

GEOLOGY Word Search

The words can be horizontal, vertical, or diagonal.

Find the terms listed below in the word search puzzle!

Volcano: A vent in Earth's surface through which molten rock and gases escape.

Continent: Large landmasses of the Earth.

Subduction: An oceanic plate is pushed underneath either another oceanic plate, or a continental plate.

Magma: A mixture of molten rock and other materials beneath the Earth's surface.

Lava: Molten rock expelled by a volcano during an eruption.

Hotspot: Areas of the mantle that are unusually hot and cause volcanic activity on the Earth's surface

Caldera: A cauldron-like volcanic feature caused by the collapse of land after a volcanic eruption.

Weathering: The breaking down of rocks, soils, and minerals through direct contact with the Earth's atmosphere.

Erosion: The process of the transport of solids from their natural source to a different location, usually through wind, water, and ice.

Igneous: One of the three types of rocks. Igneous rock is formed through the cooling and solidification of lava or magma.

Sedimentary: One of the three types of rocks. Sedimentary rocks are formed from the deposition of mineral or organic sediments.

Metamorphic: One of the three types of rock. Metamorphic rocks are created by the transformation of existing rock through heat and pressure.

Seamount: A mountain rising from the bottom of the ocean, but that does not reach above the surface of the water.

Mountain: A landform that stands higher than the surrounding land, and often has steeper sides than a hill. They are usually formed through volcanism, plate tectonics, or occasionally erosion.
